

THE PATH OF POMPONAZZI

There is a lot more to the process than just coating with Pomponazzi, our specialised and trained team go through a lot of preparation before the coating will be applied.

1. DECONTAMINATION WASH

Using a snow foam wash, the thick foam breaks down dirt, grime and everyday pollutants adhered to the vehicle and softens the contaminants allowing for a safe removal during a wash without scrubbing in any harsh substances and causing further damage to the paintwork with swirl marks and scarring. Followed by the initial wash and rinse, the car is then clay barred to remove bonded surface contaminants and industrial fallout (Airborne metallic substances that bond over time to your car) followed by a hand wash then dried for a final inspection before moving to the next step.

2. PAINT CORRECTION

This is by far one of the most important stages of detailing and preparing a car for Pomponazzi Coating. Our Pomponazzi detailers go through a process of restoring and rejuvenating the paintwork, mostly by a combination of polishing with specialised hand tools and select compounds and polishes. Starting with harder compounds, this removes the dullness, other deeper set contaminants and hazing, the final process is to use finer products and buffing equipment to ensure any marks and haziness is dissipated and the finish of the paintwork is refined. To then finalise after the final inspection, the car is wiped down with an Isopropyl Alcohol wipe to remove any oils that may have been left from the equipment and also reveal the true finish, this will allow the Pomponazzi detailer to ensure if there are any more spots that require further correcting or if they have missed.

3. POMPONAZZI COATING

This is the most enjoyable stage and where the magic happens... the freshly beautified panels receive not only an unparalleled level of gloss and depth of colour, but a coat of arms to seal and protect the hours of TLC put into the vehicle by our Pomponazzi Detailers.

THE POMPONAZZI DIFFERENCE

Pomponazzi whilst 2 years young to Australia, has been around globally since 2002, ever since its creation Pomponazzi has been growing from strength to strength and country to country.

What we started in Australia, was 12 months of R&D on our own cars and then create a process to further ensure our quality control can be met consistently and then be passed onto our select group to ensure they provide nothing but the best for our customers. You will not find our products at every detailer, nor at local car washes or even at tyre shops and random workshops.

Our science is simple to provide something that works without being too complicated, that is why our 880XX is the only coating you will need to protect multiple surfaces on your car, unlike others that require 3-4 different to do the same thing.

The Pomponazzi difference is not only that our products speak for themselves and actually do what we say they do, but furthermore our standards to become an authorised dealer and applicator ensure our quality control is met.

Our exclusivity and on-going training and support for our dealers and applicators are what set our standards apart from the rest. We want you to love your car more than when you brought it to us!

"World's No1"

"Real Quartz Coating"

WHAT IS POMPONAZZI?

- Pomponazzi is the ultimate paint protection system, consisting of REAL Quartz glass. The Pomponazzi range of products contains one of the highest purities of SiO2 (Silica Dioxide) available on the market.

What this means, is a flawless shine, resistance to scratches, protections against environmental pollutants and a hydrophobic properties to make cleaning a breeze.

WHAT DOES IT DO?

- After treating your asset with the Pomponazzi system, not only will your paintwork be protected, but multiple surfaces including rubbers, plastics, wheels and more will be protected against the elements of day to day use and foreign agents. The protection then ensures your investment is looking at its best all the time with little effort.

HOW LONG DOES IT LAST?

- Our flagship 880XX is covered by our 5 year warranty and with proper maintenance will stand up to the tough Australian conditions. We also offer another premium product 880X which is covered by a 3 year warranty and is perfect for not just vehicles, but is a great solution for PWC, all terrain vehicles and other outdoor hobby vehicles and bikes

WHAT ELSE DOES IT DO?

- Our Pomponazzi system can be used on various surfaces including, marble, granite, wood, cement, glass, plastics, rubber and more, this is what makes Pomponazzi so versatile on a range of assets from vehicles to commercial and Marine applications.

Apart from the hydrophobic properties, the ability to enrich the surfaces natural sheen it also protects against harmful UV degradation and has great resistance to Saltwater deterioration.

THE POMPONAZZI FAMILY

Multi Purpose Agent

Description:

The Multipurpose is a cleaning and rejuvenating agent, specifically designed to protect and enhance the exterior Pomponazzi protective coating.

TU Coating

Description:

TU or Transparent Underbody, is a revolutionary coating designed to an extremely thick coating to protect not only against the elements but allows a clear window to see the protected surface. It adds great protection for around chassis and other components on the undercarriage of 4wd vehicles, a perfect solution for boat surfaces and areas of high traffic and high exposure to salt air and UV. It is also useful for outdoor furniture and commercial projects including covering Concrete, marble, timber, and many more porous surfaces.....

880XX

Description:

Our flagship Product, the 880XX is an all in one solution which will coat and protect your paint, plastics, wheels, rubbers and glass. Its unique formula adds a thick coating of REAL Quartz crystal which enhances the natural colours and sheen of your paintwork whilst giving it a super sleek feel that stops water and general day to day grime from sticking.

Baloo

Description:

Baloo is our premium grade sealant and conditioner that can also be used to protect leather and vinyl. It produces a deep gloss and super hydrophobic effect, whilst adding another barrier of surface protection.

It was designed to be a versatile solution that can enrich the Pomponazzi coating's slick feel and can be used on various surfaces and applications from uncoated vehicles to household furniture, fixtures

880X

Description:

Our 880X was the original coating designed to combat the everyday grime and day to day pollutants, its REAL quartz solution covers multiple surfaces, and is a formidable product in the global coatings industry as it is used widely across Europe and Asia against affects of snow, salt and UV degradation.

As Reviewed By:

“The problem is, everyone claims superiority and yet the difference between the coatings, as we discovered, is massive.”

We came back after a few days to retrieve the coated Vantage and, well, first impressions were rather hard to describe. The difference was night and day, the new shine was as if the car had gone back to the factory and been given a brand new lease on life.
